

# WHAT MAKES A MODERN GAMMA PROBE?

**KUBTEC<sup>®</sup>**  
MEDICAL

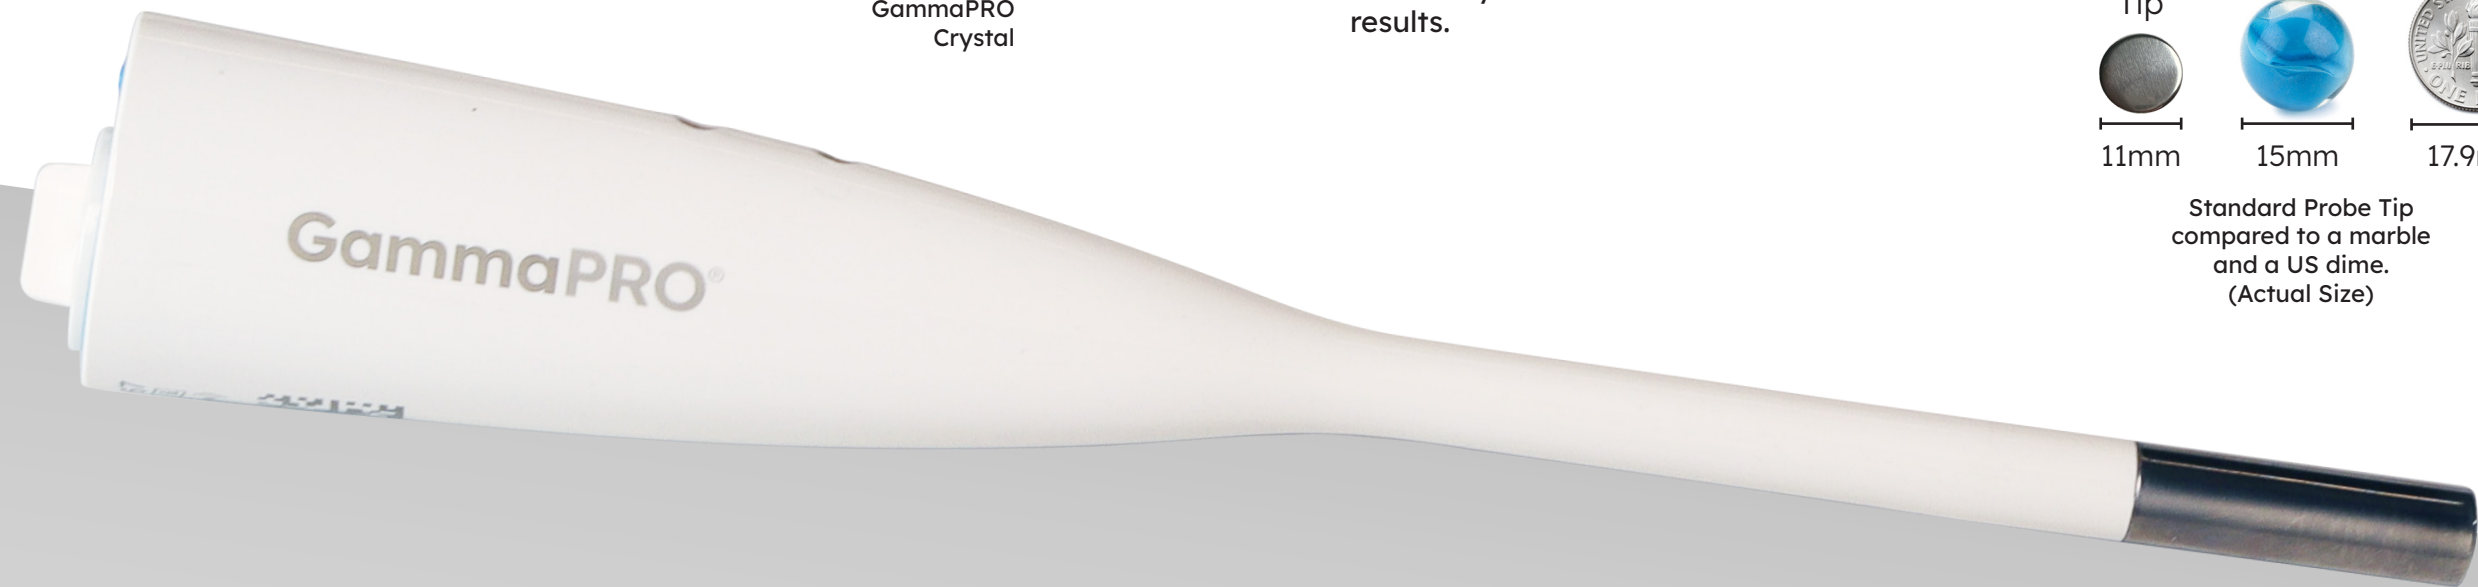

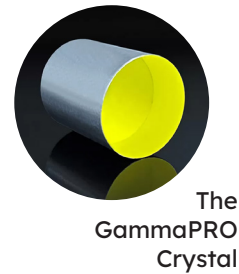

# GammaPRO®

## The Precision Probe

A modern, highly innovative gamma probe optimized for today's fast-paced clinical environment.

The unique detection crystal at the heart of GammaPRO is a pivotal advancement in probe technology that sets a new standard for sensitivity and reliability. The probe also has a narrow tip, is easy to use, and integrates smoothly into the OR workflow.

## Easy to Use

### Ergonomic Design

Light weight, sleek and wireless offering easy maneuverability and portability.

### Intuitive Tablet

The rugged touchscreen tablet with custom-designed software and a large display for counts allows for swift navigation.

Functionalities include multiple isotope selection, labeled nodes, maximum cps, and much more.

## Designed for Personalized Precision Surgery

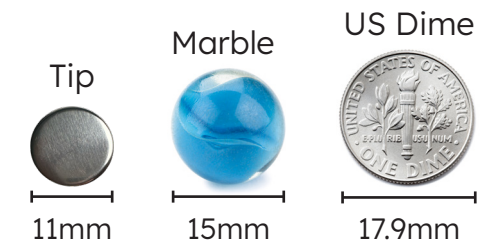

### Detection Technology:

Accurate & Precise  
High-Sensitivity detection crystal  
and built-in collimation filters  
background noise.

GammaPRO also improves node  
detection with low radiotracer  
doses as well as providing  
enhanced directionality and  
sensitivity that ensures reliable  
results.

### Minimally Invasive Tip Design

The probe's titanium tip is very  
narrow (11 mm diameter), essential  
in minimally invasive surgeries with  
smaller incisions into deeper areas.

Standard Probe Tip  
compared to a marble  
and a US dime.  
(Actual Size)

## OR Workflow Integration

### Easy Sterilization

Compatible with common  
sterilization methods and the  
battery can be left inside.

### Long Battery Life

The probe has 15+ hours of battery life  
and reliable Bluetooth connection and is  
always ready when needed.

### IV Pole Clamp

The gamma pro comes with an IV pole  
clamp that allows the system to be firmly  
mounted and seamlessly integrated into  
the OR setup.

### Smart Power Management

The probe automatically enters sleep  
mode when not in use during surgery and  
can be reconnected by a simple touch.

### Integrated with Imaging Technology

Our exclusive integration with KUBTEC  
imaging systems, meaning you can  
conveniently use the software on  
the imaging system screen, without  
needing to use the tablet.
